Gain since August, 1890...... The strike long since proved itself an utter failure. The boycott is a weak, mail-clous, impotent device of a very few selfish and irresponsible individuals. The Times defies it and them and continues to employ organized labor, paying thereto more in wages annually than any rival establishment. The business men of Los Angeles are counseled to may no attention to allen carpetseled to pay no attention to alien carpet onal anarchists and lawles es of their best interests.

We stand ready to exhibit to advertisers our circulation books and pressroom reports, at any time, as a verification of the claims above. Our charges are fixed on the only true basis, namely, the CIRCULATION of THE TIMES, which is guaranteed to be double that of any local competitive journal.

Other Foreign News-England Be coming Enthusiastic over the World's Fair-The Metz Election a Surprise to Berlin.

By Telegraph to The Times. PARIS, July 13 .- [By Cable and As sociated Press.] There was considerable excitement today throughout Paris, caused by a report that President Carnot had been shot. The rumor proved untrue, but there was a foundation for it. The President was present today at the ceremonies of the official opening of a new thoroughfare, where he received an enthusiastic welcome. Suddenly a man, wild-eyed and making masane gestures, forced his way through the crowd, rushed to

ENGLAND AND THE FAIR. Britain Will be Well Represented a

London, July 13.—[By Cable and Associated Press. The Times today in a long article on the World's Fair reviews the growth of the importance of Chicago, and says it is not doubted that the exhibition will in many respects surpass all those previously held. The paper says it is cided that the royal commission to represent Great Britain at the World's Fair shall be composed of the Council of the Society of Arts, which carries of the Society of Arts, which carries with at the prestige of having the Prince of Wales as president and Sir Richard Webser, Attorney-General, as its chairman. The royal commission has received a grant of \$125,000, which is less in amount than any previous grant made for a similar purpose. The council is confident of having sufficient funds to insure the access of ficient funds to insure the success of

In an interview on the subject of the government's grant, Sir Henry Wood, secretary of the Society of Arts and con-sequently secretary of the royal com-mission for the World's Fair, said the grant was expected solely to cover the expenses of the commission. British merchants, he added, who were represented at the recent Paris Exposition spent \$750,000 in exhibiting, and there was every reason to suppose, consider-ing the trade between Great Britain and the United States, that the British exhibitors who will be represented at Chicago in 1893 will contribute at

Chicago in 1893 will contribute at least \$1,000,000 towards the expenses of the exhibit.

The Standard says: "Chicago's World's Fair will be the biggest show on record and must not be neglected by British manufacturers and artists."

The Emperor Starts on His Trip to Scotland. LONDON, July 13 .- By Cable and senciated Press. | The Emperor of Germany this morning rode through Hatfield Park. EUROPE'S SHORT CROP. : Foreign Countries Looking to Wheat Fields of America. Washington, July 13.—[By the Associated Press.] A report on harvest prospects in France and Europe has been received at the State Department from Commercial Agent Griffin of Limoges, France. The National Miller's Association of France, the report says, has issued an estimate showing the yield of wheat for 1891 to be 31 per cent less than the harvest of 1890. Russia, Tunis, Egypt, Roumania and some Danubian provinces have fair harvests. In Hungary it will be below the average this year. Estimates given by the Millers, the reports say, are optimistic. Their desire is to create the impression that there is a better supply than really exists. This is done with a purpose. They want to buy grain as cheaply as possible in those fortunate countries that have some of

their abundance to export. In conclusion the report says that not only France but all Europe is looking to the wheat fields of the United

Robbers Force a Man to Give Up the Savings of Many Years. UNIONTOWN (Pa.,) July 13.—[By the Associated Press. | Intelligence was received here today that five masked burglars, heavily armed, entered the house of William Foster in Franklin township on Saturday and after binding and gagging Foster and his housekeeper, forced him to give up his savings of twenty years, amounting to over \$1500. The robbers are believed to be members of the Cooley gang, which has terrorized mountaineers in this county for several months.

TOULON ATTACKED.

BRILLIANT MANEUVERS OF THE FRENCH FLEET.

Balloons Used to Tow Steamers-Some Important Lessons in Naval Affairs for Other Nations to Learn.

By Telegraph to The Times. PARIS, July 13 .- |By Cable and Associated Press.] The French maneuvers in the Gulf of Lyons ended today in the whole fleet attacking Toulon. Ministers Ribot and Barbey, military attaches of the American, British and German legations and many sense tors and deputies witnessed the attack. The torpedo vessels and shore batteries defended the roadstead against the warships headed by the steel barbette, which is extremely formidable. After a furious cannonade the ships

advanced in one long line and broke through the defences. Among the features of the maneu-

vers was the use of balloons to tow steamers.

The official report of the French marior speed, if attended by a number of light craft, can be kept informed of the movements of a faster squadron and can thus be enabled to counteract the enemy's designs. Hence it is advisable to provide large, swift cruis-

BLAINE'S CONDITION. Very Hopeful Reports Sent Out by BAR HARBOR (Me.,) July 13 .- [By giated Dragg | out driving this afternoon in an open carriage. His physician said tonight that the patient was improving rapidly, He seems to have taken a fresh hold upon life and health with his strong onstitution, and one who sees him cannot fail to notice the rapid improvement almost daily. His friends feel confident that the Secretary will return to Washington in the fall perfectly well and will enter active political life. NEW YORK, July 13 .- A Bar bor special says that Secretary Blaine had a bad turn Sunday afternoon, having a sudden attack of nervous dys-

pepsia. The weather was sultry and warm, and rumor says that Biaine had just sat down to a late luncheon when he had the attack. He was helped to his couch, and in a short time grew better and talked some. He himself declared, so it is said, that he ate too much. A Trust Goes to Pieces.
St. Louis, July 13.—A prominent iewelry company received a telegram from Chicago this evening stating that the watch trust had gone to pieces under the action of the Illinois anti-trust law. The watch trust was a jobbers' association of manufacturers of Amerassociation of manufacturing con-ican watches, and comprised every large watch-case manufacturing concern in the country. The dissolution was caused by the withdrawal of the Eigin Company, which being an Illi-nois corporation was amenable to the law. This was followed by the with-drawal of others until the trust crum-

bled out of existence.

J. C. OLIVE", 101 N. Broadway. 15 Winery Burned.

Lewis Linatt's winery at San Gabriel was entirely destroyed by fire Sunday night. This is said to be the second or third attempt to burn the place. It is claimed that Linatt has enemies who might try to injure him in this way, and at the same time create the impression that he set fire to the house to get the insurance. The case will be thoroughly investigated.

Assessor Hinton Presents a Partial Report.

MESSAGES FROM THE MAYOR

The City Council met in regular session yesterday morning at the usual time and place, President Bonsaii in the chair and every ward being represented.

After the usual preliminaries had been disposed of, the following message was re-

disposed of the following message was re-equed from the Mayor:

To the honorable the Council of the City of Los Angeles: In pursuance of the re-quest of the Board of Public Works, I her-with return unsigned the ordinance of intention to improve a portion of Adams street approved by your honorable body on June 29, 1891. Respectfully,

HENRY T. HAZARD, Mayor.
On motion of Councilman Rees the vote by which the ordinance had been passed was reconsidered, and the ordinance was amended by striking out the clause provid-ing for a cement curb, whereupon, on mo-tion of Councilman Tufts, the ordinance was again adopted.

ance ordering the work of opening Santee street, between Ninth and Sixteenth streets, done, and appointing commissioners therefor, as published in The Times on Tuesday last, was then read, and, on motion of Councilman Nickell, the vote by which said ordinance had been adopted was reconsidered, and it was then passed not withstanding the Mayor's objections, on motion of Councilman Alford.

The report of the commissioners for the extension of Mott aliey from Second to Third streets, which had been filed with the City Clerk on June 8 last, in accordance with the law, was brought up, the time for filing protests thereto having expired, but, on motion of Councilman Rees, action thereon was deferred until Monday next at 2 o'clock, the report in the meantume being referred to the Board of Public Works.

An amusing communication from Jehn Mclimoil, commissioner for opening streets, in which the Mayor was secored for his action toward the commissioner was read and ordered filed.

necessary money to complete the survey and secure the right-of-way on the outfall sewer. Adopted.

The contract with E. R. Fox was again brought up, and S. W. Luitweiler having been added to the bond, both were approved, and the Mayor authorized to sign the same on behalf of the city.

On motion of Councilman Summerland the Board of Health was requested to place a sprinkling hydrant at the corner of Sotello and North Main streets.

The draft of a contract between the city and A. E. Meigs for the eastern approach to the Seventh-street bridge, and a bond with W. W. Stockwell and F. W. Tyler as sureties thereon, were read, and upon motion of Councilman Nickell, both were approved and the Mayor requested to sign the same on behalf of the city.

Upon motion of Councilman Rhodes the plans and specifications for the piping of the Arroyo de los Reyes, now on file in the City Englineer's office, were adopted.

The same member moved that the Street Superintendent cut down the hill at the intersection of Alvarado street and Boundary street, so as to make it a better grade. Referred to the Board of Public Works.

A number of bids for the supply of meat for the city prisoners were opened, read and referred to the Supply Committee, Councilman Summeriand's motion to refer to the Board of Police Commissioners being voted down.

and objected to the requisition, whereupon, on motion on Councilman Rees, the matter was referred back to the Chief for an explanation.

Then came a requisition from the City Engineer asking to be allowed two draughtsman, and that official, when called upondo make a statement, stated that the requisition spoke for itself. He did not put it in for child's play, or for the pleasure to be obtained in signing his name to it. These remarks were not received very favorably by the Council, although nothing was said at that time, and the matter was shelved without action.

The third rejected requisition was that for 325 for the hire of a buggy in which the engineer had driven over the proposed route of the outfall sewer, which had been presented at the last meeting. Councilman Nickell relievated his remarks of last week, stating that in his opinion the City Engineer and all other city officials who received high saiaries, ought to furnish their own buggies. He, however, expressed himself as willing to pay for the conveyance of deputies to and from work.

A long and rather acrimonious debate followed, in which considerable feeling was displayed, but the requisition for two drawths.

Councilman Rees thought different. They looked to the City Attorney for advice in legal matters, and he thought the Council should be governed accordingly. He, therefore, moved that the recommendation be adopted, and the attorney be instructed to draw up a proper waiver.

After debate, the matter was postponed for one week, and the City Attorney was instructed to draft an ordinance abandoning the street as far as shown by the old map, he to secure the waiver spoken of in his report.

The Twenty-third street and Mapie avenue intersection came up, when the City Attorney repeated the report made at the last meeting that the assessment would have to be corrected, so as to include the Electric Ralirod Company, whose tracks are on that street.

OPENING SESSION OF THE CHAU-TAUQUA SESSION.

An Interesting Literary and Musical Programme—The President's Address-Programme for Today.

The opening exercises of the Long Beac were busy about the tabernacle preparing

for the coming event.

The auditorium was artistically decorated. Clusters of palms adorned the pillars, tri-colored bunting floated in graceful festoons from the ceiling, and over the platform in letters of gold on a crimson back-ground were the words: "Welcome, Chautauqua Assembly," 1vy-encircled and adorned with flowers of gold.

The programme opened with an overture by the Long Beach orchestra. Then followed the chorus "Grandly thou

Flowest," sung by seventy-five voices under the direction of C. E. Day. Thorough drill and good musical talent were apparent, and the music was well worthy the applause with which it was greeted. Rev. R. M. Webster led in prayer; then followed another chorus, Mendelssohn's "Farewell to the Forest." without accom-paniment.

Miss Pearl, Noble then favored the audience with a cornet solo. As at each previous appearance, she was called upon to respond to an encore.

Gertrude Judd gave a whistling solo, and
those who have heard her during the League
noticed that while on previous appearances
her notes have been as sweet and melodious, yet she has not before given such volume to her music, nor so thoroughly filled
the auditorium as on this occasion.

Rev. Manly Benson spoke a few wellchosen words, and, complimenting the
leader of the chorus, he expressed the wish
that throughout the assembly "it may be

After another chorus Dr. W. H. Withrow
of Toronto was introduced and brought
greeting from "the land of the pine to the
land of the palm."

Dr. John H. Vincent built wiser than he
knew where he instituted this means of
universal education. The Doctor states
that there are 5000 Chautauquans in Canada
scattered from Labrador to British Columbia. He attributes much of the "University Extension" movement to this impulse given by the Chautauqua. "Itbroadens our thought, fills our universities,

The Oakies sang "King Dem Bells," the
chorus rendered a selection, then by request,
the first number, "Grandly Thou Flowest,"
was repeated, and the entertainment
closed.

The brute has already chewed up two or three people, and the officers have done all in their power to induce the family to kill him, but they will not give their consent, and as the law will not permit an officer to go in a man's yard and kill a dog, even for cause, they have been unable to do anything.

Yesterday morning the brute caught a little ten-year-old boy named Shaw, who lives with his parents on Downey avenue, in front of the h-use and bit him so severely that medical sid had to be called in. If the owners of the dog do not give their consent to have him shot the officers will watch until they catch him out in the street, when they will shoot him.

A SERIOUS ACCIDENT.

Early yesterday morning a truck was passing down Downey avenue near the bridge, when a little eight-year-old boy named John Eliey ran out from the sidewalk and attempted to climb on the hind end of the truck. The horses were going at pretty good speed and he fell to the ground, Gathering himself up he ran around to the side of the truck and caught hold of one of the wheels. The wheel swug around and passed over his hand, crusning it in a most frightful manner. A doctor was called in and the little fellow's hand had to be amputated.

After the complaint, which stated that the boy was incorrigible, disobedient, insolent and unmanazeable, had been read, Mrs. Emms. occurred about eleven years ago, the boy remained in his father's custody until about three years ago, when he came to her and stated that his father had ill-treated him. He was then ragged and dirty, and she at once-took him to a clothing store and bought him a new outfit complete. She then sought her attorney and learned from him that the boy, being 14 years of age, could choose his own guardian, and that she need fear no trouble on that score. She then tried to send him to school, but it was of no use, and she finally sent him to a friend at Colton, who soon sent him back as unmanageable. Curtis was then sent to work on his uncle's ranch, but returned; and the witness again sought her attorney, with a view to putting the boy on a naval training ship, about a year ago. Being loth to part with him, however, she obtained employment for him at the furniture store of W. H. Woodham, No. 263 South Main street, it being agreed that he was to receive \$20 for the following months. He drew part of this money himself and the witness drew the rest, with which to pay her grocery bills on various occasions. The boy was in the habit of staying out late at night, and sometimes did not return at all. On Friday night last he came home drunk, and the witness was oblized to obtain the assistance of Mr. Woodham to put him to bed. She then testified as to her inability to pay for the boy's keeping at the reform school at the required rate, \$55 per quarter.

Of course if Director-General Davis does not recede from the position taken heretofore, that if Forsythe was rejected he would not consider any other Californian, the matter is settled so far as this State is concerned. But if, on the other hand, the Director-General should reconsider the utterance on this point, in view of the fact that California's claims for the place are generally conceded, there is nothing in the way of Mr. Shorb's appointment. His fitness for the position is conceded, there is no other Californian prominently mentioned, and his appointment would be generally indorsed.

Founder of California Missions.
A number of people went to Monterey
June 3 to attend the ceremonies incident to unveiling the Serra monument. There were delegations of Native Sons, Pio-neers and members of the Young Men's institute. Mrs. Stanford did not go down. The monument is the gift of Mrs. Stanford, as a tribute to the memory of Father Junipero Serra, the founder of the California missions. It has been erected on a hill near the old wooder cross that marks the presumed spot where the padre first landed. The monument is of granite, and represents

He took high rank as a scholar, and all the honors and dignities of the church were open to him, but he preferred the life of a missionary, and in 1749 he set sail for Mexico. In that country he spent many years, partly as a teacher in a Franciscan college and partly in mis-sionary work, but in 1767 his great opportunity came, and he was sent out to establish those missions which began the civilization of California.

The City of the Future.

The city of the future in a country where cities are not left to accrete by chance, but are laid out with some r gard to their possibilities, will undoubt-edly be planned with definite regard to Washington was thus laid out and Boston was not that Washington promises to be the most symmetrical and the handsomest city in the world, while Boston remains and will always remain an agglomeration of straight crooked cowpaths. New York, in some respects the most unfortunate of all American cities, owing to its longitudinal limitations, is forcing attention to this fact with increasing poignancy every

day.
Suppose for a moment that New York had been planned as any great modern structure is planned—that is to say, by beginning at the cellar. Suppose it had a sub-story, and in great part a roof! DR. WOH, The Eminent Chinese Physician.

Dr. Woh's life work has been from early youth one of persistent and untiring observation, study and investigation, as fully as lay in his power to perfect himself in all branches of the art of healing human sickness and disease. Born in China, of influential parents, of a family whose ancestors have been for generations deservingly renowned as leading physicians, Dr. Woh naturally followed in the footsteps of his fathers. In China he has practiced his profession for several years, being at one time a physician in the imperial Hospital, and in America for a long time his great number of patients, his wonderful and many cures, and the great list of letters from grateful and thankful patrons now prove him to be a remarkable and successful healer of sickness and all diseases.

May 1st. 1801.

I have tried many doctors for heart disease but have derived no benefit until Dr. Woh, the Chinese physician, of Los Angeles City, prescribed for me.

Two months ago I began his treatment and can now certify that be has done me great good. I recommend Dr. Woh to my friends as an able doctor.

The Chicago Singer Machine has a very important improvement in a Loose Balance Wheel, so constructed as to permit winding bobbins without removing the work from the machine.

The Loose Balance Wheel is actuated by a solid bolt passing through a collar securely pinned to the shaft ourside of the balance wheel, which bolt is firmly held to position by a strong spiral spring. When a bobbin is to be wound, the bolt is pulled out far enough to release the balance wheel, and turned slightly to the right or left, where it is held by a storping until the bobbin is filled. Where the machine is liable to be meddled with by children, the bolt can be left out of the wheel when not in use, so that the machine can not be operated by the treadle. The thread eyelet and the needle clamp are made self-threading, which is a very grea

Now, this is a very pretty story, but the figures must be a little off, as \$66.66 an acre gross is a very poor price to get for an orange crop-at least eastern people will think so, after reading some of our Chamber of Commerce bulletins, which made a yield of ten times that amount quite common. INFORMATION has been received in New York to the effect that all Chilean insurgent vessels, with the exception of the Huascar, had left northern ports for the south with the intention, it was believed, of attempting a decisive blow against Balmaceda's fleet before the powerful ships that will soon be on the way to the assistance of his party from France are able to get there. If the surmise turns out to be correct the next batch of Chilean news may tell of some lively naval engagements.

> Vailey Around Salton. CONJECTURES AS TO THE CAUSE

It Caused by the Inflow Large Subterranean Lakes?
-Col. Blanton Duncan's Idea.

|Louisville imes, July 3.| The phenomenon that has produced large lake in California just above the head of the Gulf of California is of such a startling character that a Times reporter called on Col. Blanton Duncan to get a description of the locality, and the probable result on the sur-

rounding section.

Col. Duncan first drew a sketch of the country showing the inundated section and surrounding country. With this before him he said: "The surmises of various persons as to the cause of this lake are guided by nothing sufficient to give a correct idea. The Southern Pacific road, atter it crosses the Colorado at Yuma, runs to the northwest in San Bernardino county, by a valley be-Bernardino county, by a valley be-tween two high ranges of mountains. stantly going on in the desert. Such including the Gulf of California further north into the bed sago was something grand indeed. The and a range of mountains runs close on the west side of the Colorado for a distance of nearly 100 miles. On the west side of the desert there is a continuation of the Sierra Madre Mountains, which become the San Bernardino Mountains and the San Jacinto. From the ocean to Indio and Salton it is about swent; wiles and many miles. is about seventy miles and many miles of intervening mountains of 3000 feet and upward. In the San Bernardino and San Jacinto mountains there are numerous large mountains of 10,000 to 13,000 feet altitude, covered with snow the year around. All of those mountains intervening from the ocern are ner excavated through those seventy miles of solid stone a passage for its waters. The saltiness of the waters, exceeding the density of the Pacific, could easily be accounted for by run-ning through the vast beds of sait and alkali, which extend over many thou-sands of square miles in those mountains and valleys.
"No fixed data has been given as to

the point from which these waters pour out such a volume, but that it must be very great chasm is apparent from the statements already made.

"If in two days a lake is formed—taking a conservative basis and not the extravagant one, which says it is forty miles long or eighty miles long by forty miles broad—and estimating that it really has filled up that valley twenty miles by thirty, and still flow ing on with a current of tour and one half miles per hour, the calculation can easily be made as to the enormous volume. It must have filled up some of the deeper depressions to a vastly greater depth than the statement of eight and one-half. In the low spots of 300 teet the water would continue to run until there was a level with higher spots, or there would be no extension of the area. It must be surmised that the mean depth in that whole valley can not be less than thirty feet, and it is rising over the whole 600 or 1000 square miles at the rate of seven inches per day. Make the calculation of the quantity of water, not estimating the enormous quantity drank up by the sands, and it would be for 1900 square miles 836,352,000,000 cubic contents in eet after only forty-eight hours' outflow, besides the waste and evaporation. Now, to show the untenable position of Prof. Powell and others. who treat this as simply the surplus water from the Colorado, which is not a deep stream, and in my judgment subject by supposing the Onio to have well founded. Its effect upon climate would be local, and confined to the region round about the desert lake; and that effect would be, in all probability, very much to improve it. It would be, on a small scale, a very small scale, comparatively like the plan of De Lesseps to flood the Great Sahara Desert of Africa from the Atlantic Ocean, or the Mediterranean Sea.

Many objections were raised to De.

Many objections were distinct subject by supposing the Ohio to have poured its waters somewhere above us subject by supposing the Ohio to have poured its waters somewhere above us subject by supposing the Ohio to have poured its waters somewhere above us or cops yearly, and tobacco is a marvel, into a lake, and, taking its depth at 8 sociated Press dispatch states that his nomination was rejected. In any case, he is evidently out, this two way of letting poured its waters somewhere above us subject by supposing the Ohio to have poured its waters somewhere above us or cops yearly, and tobacco is a marvel, into a lake, and, taking its depth at 8 sociated Press dispatch states that his nomination was rejected. In any case, he is evidently out, feet, how much would all its waters at 4000 feet per hour and its width here at 4000 feet, bow much would all its waters at two wyears ago to get fine tobacco seed for the ties, without count of the tobacco, with proper cultivatively million cubic feet. And how does that computing the open depth at 8 sociated Press dispatch states that that effect, who was the solicity at 16,000 feet per hour at 16,000 feet per hour at 16,000 feet per hour the with the seving the Ohio and the feet, its vel

the vast surplus which has been wasted in the sand and evaporated—probably an equal amount? It would take just thirty-four rivers like the Ohio at its present stage to deliver the amount of water now standing in the lake, and not a drop would be running below the fails! So Prof. Powell and the others will have to come again. The rise of seven inches per day over 1000 square miles means a source of surplus water—for we do not know is how to compute the waste—of 16,727, 240,000 cubic feet, only three-fourths of the surplus, which is gaining and spreading. And as it reaches fresh deep depressions the rise is enormous when these have to be filled up probably 100 feet deep or more. The inquiry as to the source must therefore go further

up, and it will be found that at a mile one would have to go down 100 feet on a little higher level; at two miles 200 feet, perhaps, as the ground ascended, and so on, the depth of the well to the spring being more as one went back to the mountains and the mountain would strike vast streams of water. I therefore suggested, and am fully convinced, that beneath the mountains water, which will yet be the means of irrigating the supposed sterile fields. The Sierra Madre Mountains, the San Bernardino and San Jacinto comprise between 30,000 and 40,000 square miles. There is a rainfall of eighteen inches, and the computation of the

amount carried off by the various amount rivers demonstrates not oneamount carried off by the various small rivers demonstrates not one-third of the total. Where is the balance? In vast subterranean lakes, which have held the waters for centuries, and only the overflow seeps out through the underground streams. It was discovered a year ago that the Los Angeles River at San Fernando, twenty miles up, was carrying off in the solid sand vast volumes. A canon 1000 feet wide was ditched down to bed-rock, and a stone dam put to bed-rock, and a stone dam put across, and now the water rises and pours over in quantities to irrigate many thousands of acres. This has been done in other places with perfect success. Only \$100,000 was spent on the San Fernando dam, and it is worth

almost that sum annually.

"Responsible parties telegraphed to
the World that the earthquake that occurred some days ago, was quite violent in the mountains. Twenty seclent in the mountains. Twenty seconds is very severe and two vibrations are described. The ground upheaved and dropped back, and that it was like the 'rocking of a cradle on an uneven floor;' and that the sounds of crashing rocks could be heard in all directions. Their camp was very dry Saturday night, but at daylight water appeared everywhere on the ground as if a heavy rainfall had occurred. One of the Indians showed them a huge gorge apparently fathomiess, which he said was never seen there before. It is conceded that water has been coming in about Salton from Colorado, but nothing in comparison to that now flowing in. It is very probable that the earthquake distributed the rocky dama of quake disrupted the rocky dams of some subterranean lake and those waters poured down and through the channels thus formed. They must have come into some deep depression and thus like a monster spring forced their way through the saud; the stream would have shown itself on the mountain and its roar would have been heard for a score of miles around. where in those localities; and once having filled up the sand the only loss will be evaporation. A quarter of an inch would be enormous per day, and the telegram describing Prof. Bowell's opinion of 100 inches is probably a misprint. The whole valley of ninety miles by forty will fill up if the source is up 1000 feet or more under the mountains, and the level would only be reached when the water found only be reached when the water found a point where it could surmount the sand hills and go on thence, either to the Colorado at or near Yuma, or by means of New River down into gulf. The probability is that it will follow the Southern Pacific track and pour in a large river to increase th colorado and make it permanently navigable. This river has gone nearly smelts, we can withhold our judgmen until some have been caught and eaten Doubtless in any subterranean there would be multitudes of which will go through the outlet.

"What do I think will be the resul to the Southern Pacific Railroad? If the 100 miles of track is destroyed by being deeply immersed, before steps are taken to remove the rails, etc., it would cost \$3,000.000 or \$4,000.000 to build the road around the level of the lake after it pours out in the southern end. If the rails should be immediately removed, there would be a loss of over \$1,000,000 to relay the track, and probably several months of interrup-tion of traffic. The railroad has ample means to provide against the calamity by putting some tugs on the lake and sending down numbers of barges; which could be made in sections in various localities, and then put them together on the lake. By this means the cars could be transferred, though much loss of time would occur.

"Now, as to the character of that valley in climate, population, pro-duction and value. Indio, one of the lowest depressions, and up at the north end is a wonderful place. Physicians have been recommending it as the best spot on this continent for pulmon-ary and rheumatic invalids. It is, of course, warm, the sands all around re-flecting the heat in summer. It is de-liciously equable during the winter months with only slight rainfall. The grapes grow and bear four distinct most likely comprise 3200 miles, nearly three times as large as Rhode Island. As to its population, it is sparse in whites, only a few thoussand, maybe 2,000.

"What do you think will be the con-sequence of this overflow if it is per-manent?" "The whole surrounding country

would become very valuable, just as the lands around our great lakes, which for grapes alone sell often at \$1000 per acre. Vineyards and fruits of every description would grow in the most perfect condition of size and flavor, and wine would probably emanate from that spot equal to any in the world. One of the difficulties of the to the source must therefore go further from that spot equal to any in the on than that of the ocean or river. The river could not break through that chain of mountains, and as it does not the mountains, and as it does not to seem to come in above Yuma, it must go around the mountains 100 miles north of Yuma, if that is the source—like a sirocco with nothing to temper and the river would be dry at Yuma, if such a stream had been diverted—off a great portion of the deligo around the mountains 100 miles north of Yuma, if that is the source—and the river would be dry at Yuma, if such a stream had been diverted—the Colorado would be equal to at least fifty Ohlos!

"During the visit of the Senatorial Committee to California (Senators Stewart and Reagan) I was invited by the various committees of Los Angeles, as I had been intimate with both Senators, to accompany them through Southern California, while in through Southern California, while in yestigating irrigation and sources of of reservoirs the air must feel its inboth Senators, to accompany them through Southern California, while investigating irrigation and sources of wa er. I propounded to them my observations of the development of water supply, and suggested a view which none of them had previously considered. Artesian wells are to be found in almost every locality, over vast tracts of land, and subterranean streams seem to flow from the mountains toward the sea, along a certain grade, so that in digging down forty feet near the sea coast water gushed up, and it will be found that at a mile one would have to go down 100 feet on a little higher level; at two miles 200 feet, perhaps, as the ground ascended, and so on, the depth of the well to the spring being more as one would back to the mountains. On the ground near by were evidences of a desperate struggle, and it was thought that someone had been murdered there and the body sunk in the marsh. Today the sheriff arrested Joseph Walker, a brother of John Walker, the owner of the ranch, for complicity in the murder.

It has been learned that Walker, in company with two Indians and their wives on the night of July 4 was at the spot where the bloody garments were found. Walker explains the blood on the shirt found by saying that while trying to protect an Indian woman from a beating by her husband he received a blow on by her husband he received a blow on the nose, causing it to bleed. The In-dian then tore off his shirt, allowing him to wipe the blood on it. The In-dian denies this part of the story, but says that Walker was there. Both In-dians have been arrested on a charge of murder. Thus far no trace of the body of the supposed murdered man has been found.

A young man named George Fisher, who has been working about Sabasto-pol for several mouths, is missing, and it is thought probable that he has been murdered. John Walker, brother of the accused man, is one of the largest land-owners in Sonoma county, and proprietor of the woolen fills at Santa Rosa.

THREATENED WITH FAMINE.

An Edict that is Severe on New-foundland Fishermen, St. George Bay (N. F.,) July 13.— By the Associated Press.] The procamation closing British lobster factories along the coast of Newfoundland s practically an edict of starvation to hundreds of people, and unless the people of Halifax and other parts of Canada organize a relief fund, great Canada organize a relief fund, great destitution, if not actual starvation, must eusue. The scattered people on the west coast are also dependent upon the fisheries; but the most important question is, will the British government compensate the thousands of people whom they prohibit from making a living? These sixty factories are closed down by British warships at the demands of French naval officers, without any regard to their interference or otherwise with the French factories or fisheries. The French assert that they are open in violation of the modus vivendi.

The High Priest of Truth.

You will not easily find a second Thackeray. How he can render with a few black lines and dots shades of ex-Thackeray. How he can render with a few black lines and dots shades of expression so fine, so real—traits of character so minute, so subtle, so difficult to seize and fix, I cannot tell; I can only wonder and admire. Thackeray may not be a painter, but he is a wizard of a draughtsman; touched by his pencil, Paper lives. All is true in Thackeray; if Truth were again a goddess. Thackery should be her high priest. The more I read of his works the more certain I am that he stands alone; alone in his signacity, alone in his truth, alone in feeling (his feeling, though he makes no noise about it, is about the most genuine that ever lived in a printed page), alone in his power, alone in his simplicity, alone in his self-control. Thackery is a Titan, so strong that he can afford to perform with caim the most Herculean feats; there is the charm and majesty of repose in his greatest efforts. He borrows nothing from fever; his is never the energy, deliberate energy, thoughtful energy. The last number of "Vanity Fair" proves this peculiarity. Forcible, exciting in its force, still more impressive than exciting; carrying on the interest of the narrative in a flow deep, full, resistless, it, is still quiet—as quiet as reflection, as quiet as memory; and to me there are parts of it which sound as solemn as an oracle. save the taxes, replied: "Well, as I shall mot be required to pay more than two dollars a year for the rest of my life, it would not be worth while." The travel has increased on these roads tenfold in a works no fantastic changes at its own wild will; it must still achieve the task which reason and sense assign it, and none other. Thackeray is unique. I can say no more. I will say no less.

Heathen Bites. The corner of Jackson and Dupont streets witnessed as heathenish a scene recently as any four corners in China-

town ever presented.
It was about 10:30 o'clock in the forenoon, and the narrow thoroughfares were crowded, but the crowd made no difference to the Mongols who gathered there to perform their heathenish rites. First a bonfire was built in the middle of the street, then a big wooden idol fully three feet tall was carried out and placed in the center of the flames. Twenty-four bowls of rice were laid out in a circle about the fire; six bowls of fat came next, and then four roasted chickens. A crowd of Chinese gathered with un-covered heads. First one salaamed to

A tomtom was sounded until those in the distance the nght a boiler factory had started up near by.

The big idol grinned and grinned and grinned, and did nothing but grin, albeit the flames were fast consuming his godly person. And as the idol grinned the heathen worshipers grinned, until it became a grinning match all around.

the idol, then another, then all together.

"Him bad luckee," said Tin Chum. who was asked to explain the queer performances. It seems that the family of Bod Ding Lee were consuming an old patron idol of the family because he prought ill fortune on the house. Last week Bod Chee was locked up as a va-grant, and on Wednesday Bod Dung fell ill and died. So on Friday the patron idol was burned alive. - San Francisco

Where Flesh Turns to Stone. The character of the soil in and around Rapid City, S. D., has a peculiar and marvelous property; a wonderful characteristic which completely controverts the Biblical injunction, "Dust thou art, and to dust thou shalt return." For the last fifty years the "Bad Land," lying seventy-five miles to the southeast of the little city above mentioned, has been the wonderland of America, it being a locality unequalled in the world as a receptacle for petrefactions of animals of both the land and water kind. But the wonders of the "Bad Lands" are equalled,

in one respect at least, by the mineral saturated soil at Rapid City. True, petrefactions of remote geologi-cal ages are not found in such profusion at Rapid City as they are farther south, but, what is equally as wonderful, human bodies which have reposed but a short time in the soil of those South Dakotean hills are transformed into statues of stone as hard as the hardest marble. But few of these last resting places have been disturbed, and those only when friends thought it absolutely necessary; however, in each case the same peculiar ity was exhibited. -St. Louis Republic.

The state of the warmest of the warm

all the home news, and a summer trip is made all the more pleasant when you know what is going on at home.

A trip that cannot be too highly recommended is that to Mt. Wilson. There are two trails leading to the summit, and there are two camps on the top, where the wants of man and beast are well provided for. The scenery is of wonderful grandeur, and is as varied as it is beautiful, and the mountain air is pure and bracing. The trip possesses a novelty and charm which cannot be described and which can only be appreciated by personal experience. By all means, go to Mt. Wilson. This is the time of year in which to make the trip.

Co. B held a regular weekly drill last night at the Armory.

Mr. Rogers came down from the peak yesterday atternoon.

J. W. Wood is expected home from San Francisco in a few days.

Judge Magee expects to make the trip to the peak in a short time.

Isaac Springer has returned from a brief but enjoyable trip to the beach.

Robert S. Lindsay has gone to Alaska in company with Capt. Bartlett and family.

A party of eight Pasadenians made, the ascent to Mt. Wilson yesterday morning.

Rev. Mr. Hall, pastor-elect of All Saints' Church, is expected in town next week.

which to make the trip.

What is it to be a member of City Council? Certainly the position is no sineeure. There is a certain amount of honor attached to the office, but the emoluments are nil and the work is heavy and exacting. The Saturday meetings, which occupy several hours meetings, which occupy several hours when the council of heavy and exacting. The Saturday meetings, which occupy several hours each week, by no means represent the duties imposed upon our Councilmen. We have it on good authority that a member of the present Council spends from two to three full days each week looking after the interests of the city and that his associates devote a considerable portion of their time to the same work, and yet a prominent citizen, who told a Councilman that if he assented to a raise of rates on the part of the Terminal-Railroad Company, he the councilman how of reflection, was surprised to hear from the lips of the Councilman himself that he didn't want to be reflected and that whatever stand he might the councilman himself that he didn't want to be reflected and that whatever stand he might the councilman himself that he didn't want to be reflected and that whatever stand he might the councilman himself that he didn't want to be reflected and that whatever stand he might the councilman himself that he didn't want to be reflected and that whatever stand he might the councilman himself that whatever stand he might the councilman himself that the didn't want to be reflected and that whatever stand he might the councilman himself that the didn't want to be reflected and that whatever stand he might the councilman himself that the didn't want to be reflected and that whatever stand he might the councilman himself that the didn't want to be reflected and that whatever stand he might the councilman himself that the didn't want to be reflected and that whatever stand he might the councilman himself that the didn't want to be reflected and that whatever stand he might the councilman himself that the didn't want to be reflected and the work for the duration of aid sate by the Superior Court o' Los Andelso didn't seed that two hours and thirty-seven minutes.

A force of men has been at work for the understand to for aid sate by the Superior Court o' Los Andelso didn'ty-seven minutes.

Tho turn two hours and thirty-seven minutes.

A force of men h and that whatever stand he might take in municipal affairs would be directed by his conscience and sense of responsibility of his high office, and not by a policy having in view of the constant of the const

hardly, therefore, be accused of having any personal axe to grind in what I have to say on the matter of the proposed increase in rates.

"The Terminal company claims that under the present rates it is losing a considerable sum of money every month, Investigations on the part of the railroad commissioners and the City Council bear out the truth of this statement. Now the company asks the Council to approve a raise of rates of 10 cents on round-trip tickets between Pasadena and Los Angeles, and a raise of 5 cents on straight-trip tickets, provided that the price of monthly commutation tickets be reduced from \$7 to \$5. As nearly as I can figure it the increased rates will not net a profit to the railroad—they will simply put the Pasadena branch on a self-sustaining basis.

"It is not to be denied that the road has done a great deal for Pasadena. Its frequent train service has proved of the utmost convenience and benefit to this community, and any attempt at economy in this direction would meet with general disapproval. It seems to me that if the City Council grants the desired concessions—as is likely—their action should receive the unanimous approval of our citizens. Such of our residents as do business in Los Angeles will thereby obtain fares reduced to 19 cents a round trip, on a basis of twenty-six trips a month. The occasional patron will not feel the additional 10 cents, and the burden of the increase will fail on non-residents—strangers and tourists, who will visit Pasadena as frequently and in as great numbers at a 35 cent fare as under existing rates.

"The road will soon be extended to First street. This will provide a tenmile-ride and back again for 35 cents, the mile-ride and back again for 35 cents.

THE INDIAN QUESTION.

or 14 cents a mile. It strikes me that this is not an exorbitant price and that it will better pay Pasadenians to pay it than have the efficiency of the present satisfactory train service diminished in any particular. But this is only my opinion.

The address deliveredon Sunday atternoon in the Methodist Tabernacle on the Indian question, by Mrs. Amelia S. Quinton of Philadelphia, president of the Woman's National Indian Association, was a most excellent demonstration of the practical workings of the society among the Indians. The character and will doubtless well en-

Mrs. Quinton is a talented and eloquent speaker, and one who thoroughly understands the Indian question. She has visited many of the Indian reservations in California and believes that a great work can be done within our own borders.

Maj. Rust, the Indian agent, presided, and at the close of the address a short meeting was called, which resulted in a call for a public mass meeting to be held in the Methodist Church on Thursday evening at 8 o'clock, at which time Mrs. Quinton will deliver an address on the Indian sitution. It is hoped there will be a large gathering at this meeting. The pastors and members of all churches in Pasadena are cordially invited to be present.

It is hoped that as a result of this meeting an auxiliary association can be formed in Pasadena for the purpose of doing some work among the Indians of our own State. It is expected that Maj. Rust will preside. George Taylor, general secretary of the Young Men's Christian Association, was appointed to look after the newspaper notices and general publication of the meetings. Any additional information can be gathered from him.

ONE MAN'S OPINION.

How He Looks at the Terminal Rate Matter,
The following letter, received yesterday, is self-explanatory:

"I do not hold a pass over "the looks at the terminal road."

A joint meeting of the arrangement.

Rate Matter.

The following letter, received yesterday, is self-explanatory:

"I do not hold a pass over the Terminal road, neither am I a commuter, whose business calls me to Los Angeles every week-day; but I do travel frequently over, the road—on an average, say, of three times a week. I can hardly, therefore, be accused of having any personal axe to grind in what have to say on the matter of the proposed increase in rates.

"The Terminal company of the directors of the two water companies was held yesterday afternoon, to discuss the proposed development of water at Devil's Gate. It is understood that an old contract was submitted, approved by oeither company the right to proceed with any work deemed necessary in the matter of development, each company to bear its pro rata expense in the matter.

matter.

Late arrivals at Camp Wilson include: Homer Sopp, Ed S. Koster, J. B. Stearns, A. G. Stearns, Mrs. A. G. Stearns, Alice Finnall, Fannie Fooker, Aggie Ballantvne, Thomas Conner, Paul Conner, Frank Conner, A. C. Conner, Charles J. Fox, James Fox, Los Angeles; Louis Wagner, Redondo; W. W. Permar, Mrs. Dr. Davis, Mr. Maxwell, Miss Nye, Mr. and Mrs. Rogers and friends, Pasadena; Miss Gilbert, Yonkers, N. Y.

One season when I was camping on Lake Winnipiseogee, N. H., night found us in a wild cove, surrounded by dank swamps and morasses, and consequently infested with mosquitoes. We disliked the place, but the night was dark, we were on a strange chore school survey with the place. The strange chore school survey were on a strange chore school survey were on a strange chore school survey. the place, but the night was dark, we were on a strange shore, and reluctantly we pitched our tent. It proved just as we expected. The little pests swarmed upon us in clouds. Sleep was impossible, and we devoted the first hours of the evening to fighting our small enemies. We smoked cigars and pipes until we could scarcely breathe in the stifling air. This they seemed to like, and buzzed all the more merrily for it. We seemed the more merrily for it. We scented ourselves and the bedding with essence of peppermint, with spearmint and car-bolic acid, which pleased them so well that the myriads inside the tent called upon other myriads outside to come in and enjoy it. The situation was getting

piece or guin campnor. Taking a piece about the size of a walnut I placed it on a tin plate and set fire to it. It burned as readily as pitch, with a bright, clear flame, and apparently no smoke. And it acted like a charm. In two minutes the noisy hum of the mosquitoes had ceased; in five minutes not one of our winged persecutors remained within the walls of our tent. Then, making every-thing comfortable and carefully coverthing comfortable and carefully cover-ing our one window with mosquito net-ting, we went to sleep and slept the sleep of the just, with never a bite nor a hum from our odious foes for the rest of the night.—Brooklyn Standard-Union.

Photographing the Dead.

It appears that a somewhat morbid custom exists among the Viennese of having the dead bodies of children and other persons dear to them photographed, and for this purpose the corpse used to be taken to the photographer's studio. The attention of the sanitary authorities having been drawn to the danger of the dissemination of infectious diseases by this practice, a decree has been issued by this practice, a decree has been issued by the Austrian minister of the interior ab-solutely forbidding the photographing of corpses in studios open to the public, and the photographing of bodies of persons who have died of any infectious disease by professional photographers, even in rivate houses.

It was first seen shortly after the light rain which occurred about dawn, and after a space of about three minutes spent its force and disappeared as mysteriously as it had appeared.—Galveston News.

San Diego still lacks \$25,000 of having enough to secure the iron works, the \$200,000 thought to have been pledged having shrunk to \$175,000 on appraisement.

A Waterspout in the Gulf.

A bout 5 o'clock yesterday morning a waterspout measuring nearly 150 feet in diameter made its appearance in the gulf, off the southeast coast. It was moving in a northwesterly direction toward the bay and was increasing in volume as it proceeded. It was seen by several fishermen and the occupants of a number of small craft who were in its course and narrowly escaped being drowned.

Those who witnessed this nautical phenomenon state that it whirled with a sigzag motion and sent upward a sarark.

Modern literature, so far as the old fashioned scholarship could misguide it, has imitated the Roman imitators of the Greeks, so that we have not even had the advantage of aping at first hand, and we are only just beginning to feel the true influence of the Greeks, which is al-

I had been sick five months, paid out large sums of money for doctors and medicine but derived no benefit. Dr. Wong Him was recommended to me by a friend. I did not think I could get well, as my lun-s and kidneys were very bad and getting worse all the time. Dr. Wong Him took me in this condition; he has is two months' time entirely curred me, and now I feel it my duty to testify in his behalf. I wish to recommend him to the public as an efficient and skillful physician.

The work on every picture reflects great credit on the photographer, Mr. Steckel, who received the preference of the class for the work, furnishing from three to five dozen for each member of the class. The arrangement of the pictures in the frame is certainly original and the mounting unique, making the class picture of '91 one of the most pleasing of the series. The frame and pictures will be on exhibition for a few days.

A Startling Piece of Southern Pacific News.

HAS HUNTINGTON SOLD OUT?

Brakes on the Southern Pacific -General and Local Notes.

Advices of a startling nature have come

from New York regarding a railway deal of great magnitude, which, if it materializes, will be fruitful in important charges. A well-known and reputable citizen of Los Angeles, who was recently in New York, learned there that the Huntington and Searles interests, carrying the control, of the Southern Pacific Railway, had changed hands and had been acquired by the Standard Oil Company-Rockefeller, Paine, Brice, Thomas and others, who will be expany on September 1, when Mr. Rocke. feller will assume the office of president. pany on September I, when Mr. Rocke-feller will assume the office of president. According to this report the Standard Oil people held the control previous to the last annual meeting, in March, and could then have assumed the administration of the company's affirst, but an agreement was made by which President C. P. Huntington was to remain at the head of the rood until certain cherished objects had been attained. The informant of The Times heard from Mr. Rockefeller's own tips a verification of this report, when the Standard Oil king said that it had long been his ambition to control a transcontinents! railroad. On that constitute of the transcontinents! railroad. On that constitute in the said that when his ambition was gratified the propie could expect to see lower rates but in force for both freight and passenger unsiness between the oceans. Mr. Rockefeller's tactics, as shown in the manipulation of Standard Gil affairs, have shown the wisdon of making popular rates. Mr. Rockefeller's ambition of the Scuthern Pacific system, he will be content with nothing short of a through line from the Atlantic to the Pacific. While there is no official confirmation of this report about the change in Southern Pacific affairs, the information above given comes from a source which is entitled to respect, and such a change will above given comes from a source which is entitled to respect, and such a change will not be unexpected.

A SANTA FE CHANGE.

It will be officially aunounced today that It will be officially announced today that Williamson Dunn, general agent for the Santa Fé route, freight department, and fer many years connected with that company in this city, has resigned his position to take effect on the 15th inst. Edward Chambers, local agent, will hereafter have charge of all freight business in this city. Mr., Dunn has been repointed agent for the Denver & Rio Grande, with office in Los Angeles.

Superintendent W. B. Beamer of the Southern California came over from San Bernardino yesterday. Detective Will Smith of the Southern Pa-cific has returned from Visalia, where the train robbers have been on trial.

Capt. George J. Ainsworth, president, and S. P. Rees, auditor of the Redondo Railroad, were in the city ye therday, and were callers at the Santa Fé offices.

at the Santa Fé offices.

"You can put it down for a certainty," said a Les Angeles ran, and official yesterday, "that in all this smoke in railway circes there is sure to be some fire. There will be h. t, p. yet on the Southern Pacific."

It is new said that the Chicago and Alton is out wit ha threat to cut the Grand Army rates to Detroit down to nothing unless the boycett against it is raised. The Wab sh has made a special Grand Army rate and the Aiton is not picased.

Charles Monroe, of the firm of Wells.

Charles Monroe, of the firm of Wells, Monroe & Lee, went, north yesterday, ac-companied by Messrs. D C. Lockwood and R. L. Blair, Union Pacific attorneys. The over the Union Pacific lines.

The Atchison is now forwarding all its empty cars in Texas and Kansas to take advantage of the expected early movement of grain to market. At President Manyel's office it is stated that the Atchison has 2000 more-freight cars now man at this time last ver. year.

on and after August 1 proximo, the Southern Pacific Company will resuse to nate all freight cars not provided with automatic air brakes. Cars that are meroly piped to give air connections, as well as other common cars, will not be accepted on the lines of the company. So many accidents have occurred from hauling cars with common brakes on trains equipped for air that this action is deemed necessary.

The Navajos are a race with such narked dissimilarities in physical appearance, customs and habits as to ndicate a widely separate origin. They have until recent years been the most feared enemies of the Moquis, and it was probably their savage ancestors and the Utes who drove the Moquis from their valley homes into canon fast cases to escape destruction. Now they are intermarrying, and a few years ago I spent a night in a large encampment, where more than a hun-dred Navajos had assembled to engage a dancing festivities with their old-

me enemies.

Permit me also in this connection to Permit me also in this connection to correct the impression which otherwise might obtain, through erroneous and sensational reports published in connection with the recent military demonstration against the Moquis concerning their ignorance of the numerical forces and power of the General Government. On one expedition through this region I was accompanied for nearly two weeks by a Mosqui Indian, who had lived among the whites, spoke English, and was well informed regarding the strengh of our army.

regarding the strengh of our army.

Excepting some of the most remote interior northern tribes, none can now be found who have not obtained from some source much general information

pertaining to our civilization.
In conclusion let me protest in the name of a justice-loving humanity against the repetition of such move ments of terrifying armaments as have recently disgraced our Government in dealing with the Moquis. There was no more reason for send-

ing troops in battle array among those inoffensive, unarmed people, than there would be for charging a Methodist camp-meeting with bayonets and cannon because they refused to con-duct their meeting according to Quaker

methods.

If the Government would carefully If the Government would carefully select wise men of integrity and experience to represent its wishes and authority in adjusting all questions arising between us and the Indians, instead of ignorantly or carelessly subjecting them to the provocations of the foolish, inexperienced and not infrequently corrupt, there would very seldom be any occasion for a resort to arms. NEWTON H. CHITTENDEN.

San Diego Union: While it is known that the granite for the new operahouse comes from the neighborhood of Foster station, it is not generally understood that the quarry is on the preemption claim of Miss Brown, who gets a royalty for every block taken out. One of these just brought in was so large that four horses were required to move it.

DECISIVE Baking Powder Tests

The United States Official

Investigation of Baking Powders, made, by authority of Congress, in the Department of Agriculture, Washington, D. C., furnishes the highest authoritative information as to which powder is the best. The Official Report

MOUNT WILSON.

STRAIN'S CAMP (Mt. Wilson.) July 12.-The work of changing and improving the Sierra Madre trail continues. A new survey is being made below "Manzanita ridge" to connect with the new piece just finished from the ravine, which will render that por-tion always considered the most difficult a grade not exceeding 12 per cent. This, with the change made from the lower camp to the observatory point, will greatly relieve the last portion of the ascent. Every one remarks upon the change and wonders that it has not been made before. Competition rouses men to action. Sierra Madre

may soon boast an excellent trail to Mt. Wilson. Emile Deutsch is overseeing the work personally.

T. H. Suffel is registered for a week at Strain's camp. The mother mountain has won his affections. D. L. Green of the First National Bank is spending several days on the hill, recuperating among the pines. The camp was comfortably filled with guests on Saturday and Sunday.

Bound for Bear Valley. VICTOR, July 12 .- | Correspondence of THE TIMES. | Camping parties are going through here nearly every day going through here nearly every day for the mountains. Bear Valley is a favorite resort, where fishing is good, and boating on the lake adds to the amusement. The family of Capt. Strohn went up during the week, and expect to spend the summer there. Preciado Bros. are preparing to take a lot of freight up the valley. They have three rowboats, among other stuff, belonging to Mr. Morrison of Redlands. The boats were made in Racine. Wis., and are very pretty, light Redlands. The boats were made in Racine, Wis., and are very pretty, light boats. Dr. Bell and N. S. Embody left Victor on Monday last for the valley. The Doctor has some mining property in Holcomb Valley, which he expects to work during the summer.

Plant Geraniums. Most every housekeeper in Southern California cultivates a few flowers, and though in cases the variety may not be extensive, yet the general effect is always pleasing in the extreme. Gera-niums are probably easier to grow than most any other plants, and though very common, yet when properly culti-vated and pruned are indeed very effective. In this connection the Santa Barbara Independent has the fol-

lowing:
What a delightfully beautiful country this could be made if its people would only use a little of their energies would only use a little of their energies in making use of the natural advantages with which they are blessed. Joseph Sexton makes a good suggestion. He says: "in this country geraniums grow about as weeds grow East. They bloom nearly the whole year and should be planted along our country roads and especially along the railroads. Suppose we Long Beach, July 13.—[To the Editor of The Times.] In my remarks before the Epworth League touching upon the probable origin of the Pueblo ribes of Arizona and New Mexico, your valued issue of the 12th inst., represented me as including the Navajos among the descendants of the Cliff Dwellers. In this respect I was misunderstood.

The Navajos are a recommendation of the Cliff of the Navajos are a recommendation of the Cliff of the were planted freely the danger from fires spreading would be reduced to a minimum. ure and if they were planted freely the dauger from fires spreading would be reduced to a minimum. The railroad company each year has this dauger to pensive job to plant these pretty plants and a man going the rounds once a year would be able to keep them in shape. Planted along the foothills they would serve as a fire wall and thus render the mountain fires more easy of control."

Mrs. O'Shea, the wife of Mr. Parnell, will always have a hold on
Queen Victoria on account of the
kindness of Mrs. O'Shea's grandfather, Sir Matthew Wood, showed to
the Duke of Kent. Shortly before the
birth of the Queen Sir Matthew made
the Duke of Kent a very large loan, so
toat he and the Duchess were able to
live in England instead of in Germany. And so it happened that Victoria was of English birth, Fully appreciating the fact that it would have
